10 ENERGY-SAVING TIPS FOR WINTER WEATHER FROM BLACK WARRIOR ELECTRIC

1. Set thermostat to lowest comfortable setting or 68 degrees in winter.
2. Lower thermostat when asleep or away from home.
3. Install programmable thermostat.
4. Open curtains on south-facing windows during day to let sunlight in and close them at night.
5. Use caulk and weather-stripping to seal leaks, especially around chimneys, doors and windows.
6. Service and maintain your heating systems to keep them operating efficiently.
7. Replace air filter once a month.
8. Reduce heat loss from fireplace when not in use by keeping damper close.
9. If you never use fireplace, seal off chimney flue.
10. Turn down temperature of water heater to warm setting (120 degrees).
